HELLO

I'm **Mandy**
Designer (UX and IxD, digital, graphic)

When I design I'm busy shaping a perception or experience. Taking into account the stimulation of senses and emotions through new applications and developments.

I've always been fascinated by light and everything that has to do with it. Light is not only a functional object, but also something that affects our perception of the environment and influences our emotions.

I can say about myself that I'm creative, a strategic thinker, commercially minded and very social and communicative. According to my friends I'm a real controller. The main reason is my enthusiasm to develop myself. Once I start working on something, I do it with passion and I will stick to it until I've achieved the desired outcome.

Specialties: Creative, communicative, ambitious, analytical, accurate, enthusiasm, humor.

EDUCATION

Graphic Design
Graphic Lyceum Rotterdam
2005 - 2009
Graduated in 2009

Interactive Design
Graphic Lyceum Rotterdam
2009 - 2010
accelerated program

EXPIERENCE

1989 — Entered into the world

2005

2009

2011

2012 — **Internship - EDHV**
June 2012 - November 2012
I created new data visualization for Etroplis network. Etropolis is a platform for the creative industries. This network was build in Flash and I rebuild the whole network into HTML 5 and created data visualization by algorithms.
Final grade 9.

2014 — **Graduation Internship - Philips Design**
February 2014 - July 2014
Researched the future of light with focus on 'How can light make a person feel more at home?' I created an app that is a light solution that provides a personal color scene, generated by algorithms, when you come home in the evening.
Finished the graduations internship with a 9.
